Quantitative Investment Decisions, LLC Recognized as Top Guns Manager by Informa Investment Solutions

Naples, Florida, August, 2016 – **Quantitative Investment Decisions** today announced that it has been recognized with Top Guns status by Informa Investment Solutions' PSN manager database. QID received top quartile for its Alternative and International Equity Strategies'. QID's Alternative Asset and Fixed-Income received top one-year performance as well. The alternative strategy provides investor's a diversified portfolio of commodities and a REIT.

"We are very pleased with the consistency of our strategy performances" said Ron Santangelo, QID CIO. The firm has won Top Gun awards in three of the last four quarters across our portfolios as an ETF strategist. QID provides strategies for U.S. equity, international equity, fixed-income and commodities to provide RIA's the ability to use any of our strategies as a compliment to a solution for their clients or a complete diversified allocation across our strategies. Customized allocations to our asset class strategies provide advisors a risk or age-based solution for their clients. We provide advisors the ability to develop well diversified portfolios that their clients need with the extreme downside protection that investors desire."

Utilizing a proprietary blend of Informa Investment Solutions' top priority performance screens, PSN Top Guns ranks products in six proprietary star categories in over 50 universes. This is a highly anticipated quarterly ranking and is widely used by institutional asset managers and investors.

Top Guns receive a star rating in the range from one to six. The stars indicate the continued performance over length of time. XYZ firm was named a Top Gun with a star rating of X meaning...

1-Star Category: Products with this rating were top ten performers within their respective universes, based on quarterly returns.

2-Star Category: These products were top ten performers within their respective universes, based on returns for the one-year period.

Quantitative Investment Decisions goal is to efficiently remove emotional and irrational behavior from investor's decision making. The intent is to **outperform** the given benchmark over a market cycle. A sequence of proprietary algorithms provides investor's adaptive risk allocation strategies that determine when to put risk on or take risk off. The algorithms provide discipline to tactically allocate monies across asset class sectors. A unique attribute of our strategies is a built-in downside loss protection mechanism. The mechanism signals to

raise cash during periods it identifies as having a high probability of substantial market loss. Our strategies tend to provide a more asymmetric risk profile with reduced left tail risk, a feature absent from buy and hold portfolios.

"We congratulate Quantitative Investment Decisions on their distinction as a PSN Top Gun. This highly anticipated quarterly ranking recognizes elite performers on the leading investment manager database in North America and is widely used by institutional asset managers and investors across our platform," said **Leno Toich, Managing Director of Informa Investment Solutions**. "PSN Top Guns ranks products in six proprietary star categories in over 50 universes."
